

Application for Research Time – Pilot Project

The MR scanners at the Seaman Family Centre are operated on a cost-recovery basis. A limited amount of research scanner time is made available for preliminary investigations. Investigators and their Department Head must certify that no other means for pilot funding is available. This time is provided for investigators to obtain data prior to the submission of a research proposal. On a case-by-case basis, the Centre staff is also available for consultation in regards to experimental design and data analysis. Each proposed project will be limited to <10 scanning sessions.

Please complete the following information and return to Patti Paulson at the Centre. Any questions may be directed to Ms Paulson at 403 944 8160 or Patti.Paulson@albertahealthservices.ca.
